

Putting off your MDM migration?

Not enough people, not enough time, and no way to know if it’ll be worth the effort.

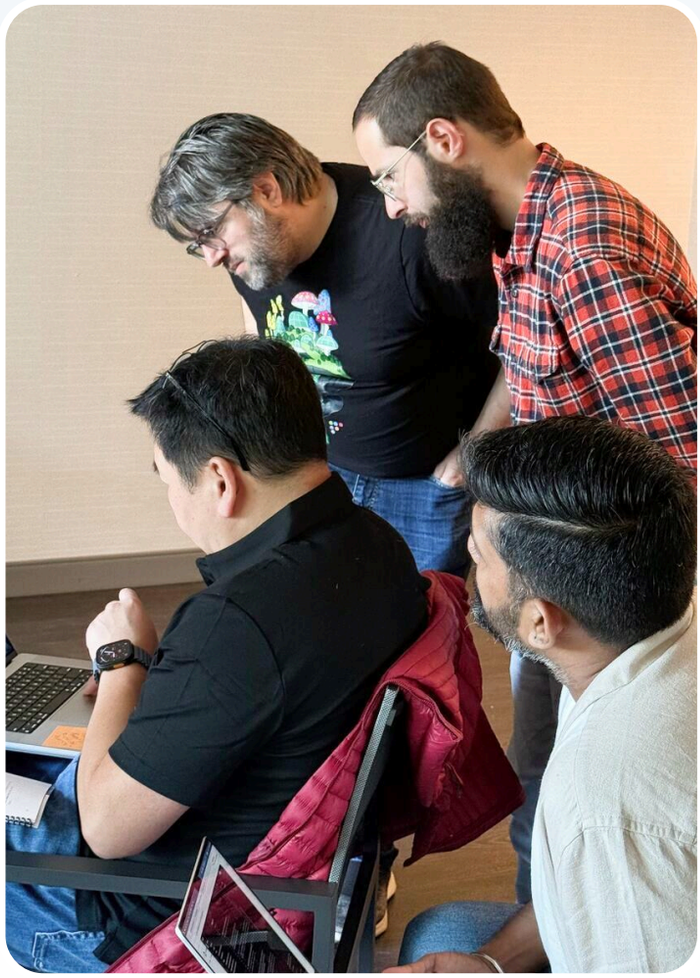

See Fleet running with your devices before you commit

On-site or in Zoom, Fleet engineers set up Fleet in your environment, with your real devices.

Fleet safely runs alongside your existing MDM during migration.

Get certified while we're with you

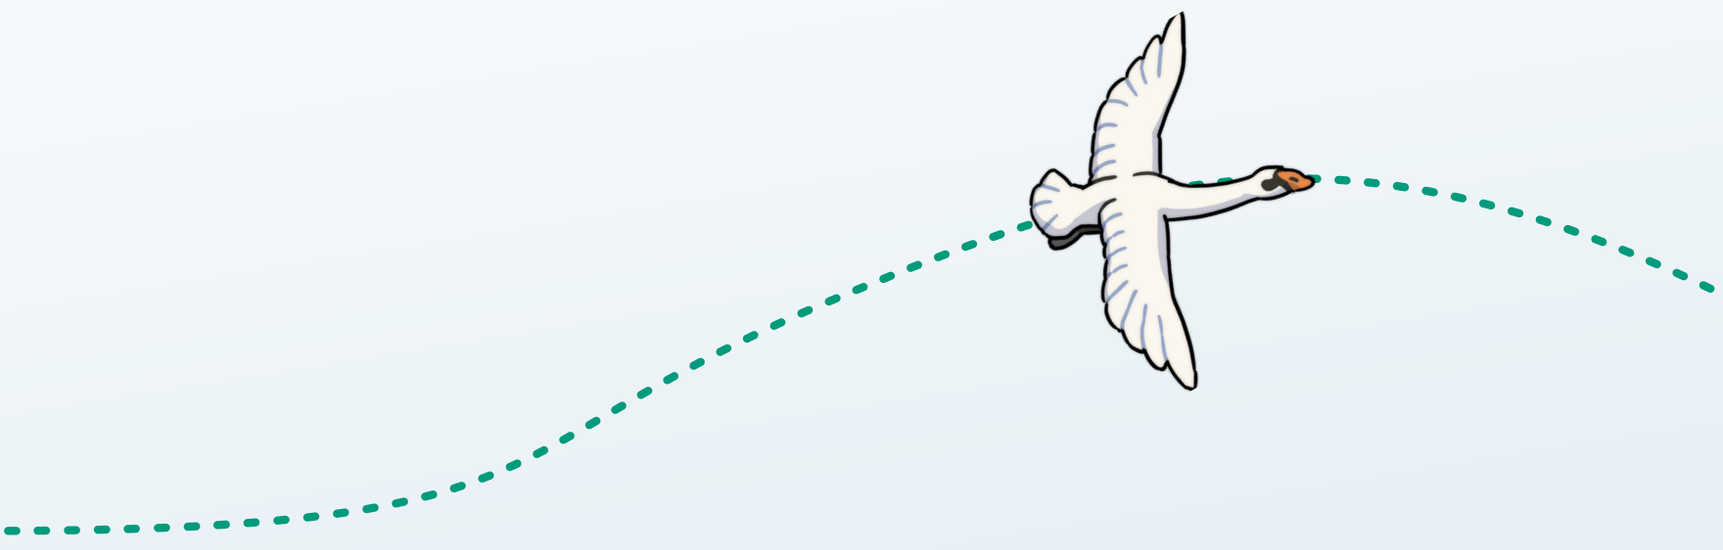

Your team learns as you go, receiving Fleet certifications for Windows and Apple management.

No time to translate? We'll do it for you.

Fleet's IT engineers translate your policies and smart groups from Jamf and their equivalents from Entra and Intune.

Work with people who have done it

Our support team is available 24 hrs/day on weekdays, and responds in under an hour. We will make sure Fleet work for you.

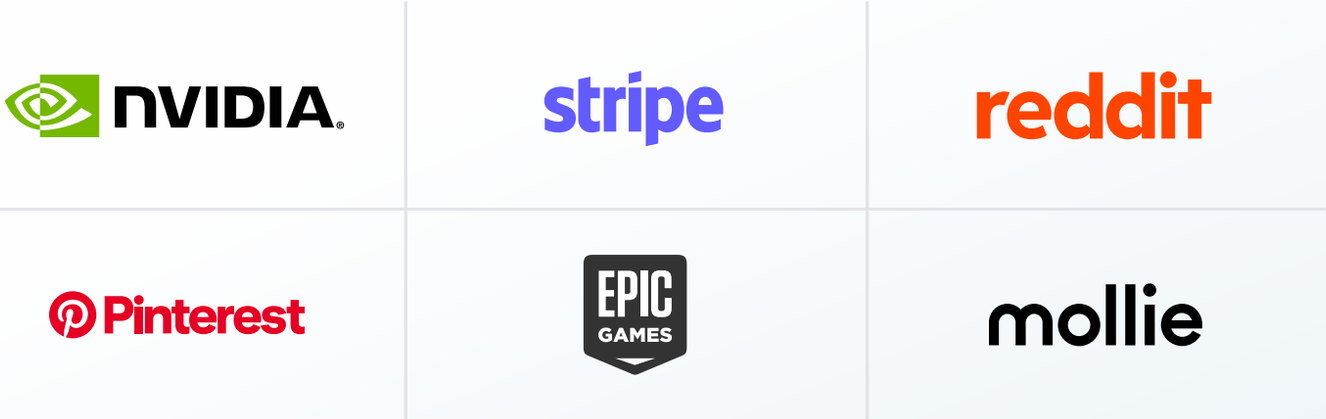

What teams get back

After switching to Fleet, customers report getting their time back:

- 50-80% less maintenance
- 99% fewer tickets during new hire setup
- 40 minutes or less to set up a new hire

+

5/8 of this year's hottest IPOs

We've helped hundreds of teams

Let's plan your next 90 days with Fleet.
