# Manage devices like it's 2026

Open MDM, patching, and vulnerability management for every OS.

# Is it any good?

Teams like yours already use Fleet.

- **From 80% → less than 1%** onboarding errors at a leading GPU company, after switching to Fleet.
- **20 hours/week saved** managing devices at a leading liberal arts college.
- **24% saved** on licensing costs, **50% less** time on maintenance at top social media company.

5/8 of this year's hottest IPOs

# Are your tools keeping up?

Traditional device management was built for computer labs in the early 2000s.

# The world has evolved rapidly

50% of Fleet customers already manage devices as code. It's what makes AI-assisted IT possible.

*“The shift to GitOps has modernized our operations giving us the agility and change control we needed, giving leadership real-time confidence in device health and compliance.”*

**Dan Jackson**

Sr Manager Systems Engineering

# Your path to Fleet

## 1 **Proof of value**

Shared Slack, dedicated support.

## 2 **Contract signed**

Procurement can take a few days to weeks depending on your process.

## 3 **Migration**

Phased rollout. As little as two weeks.  
Stripe moved 10,000 devices in 10 days.

## 4 **Live**

Most teams report 114% ROI or higher by month 3.
