Manage devices like it's 2026

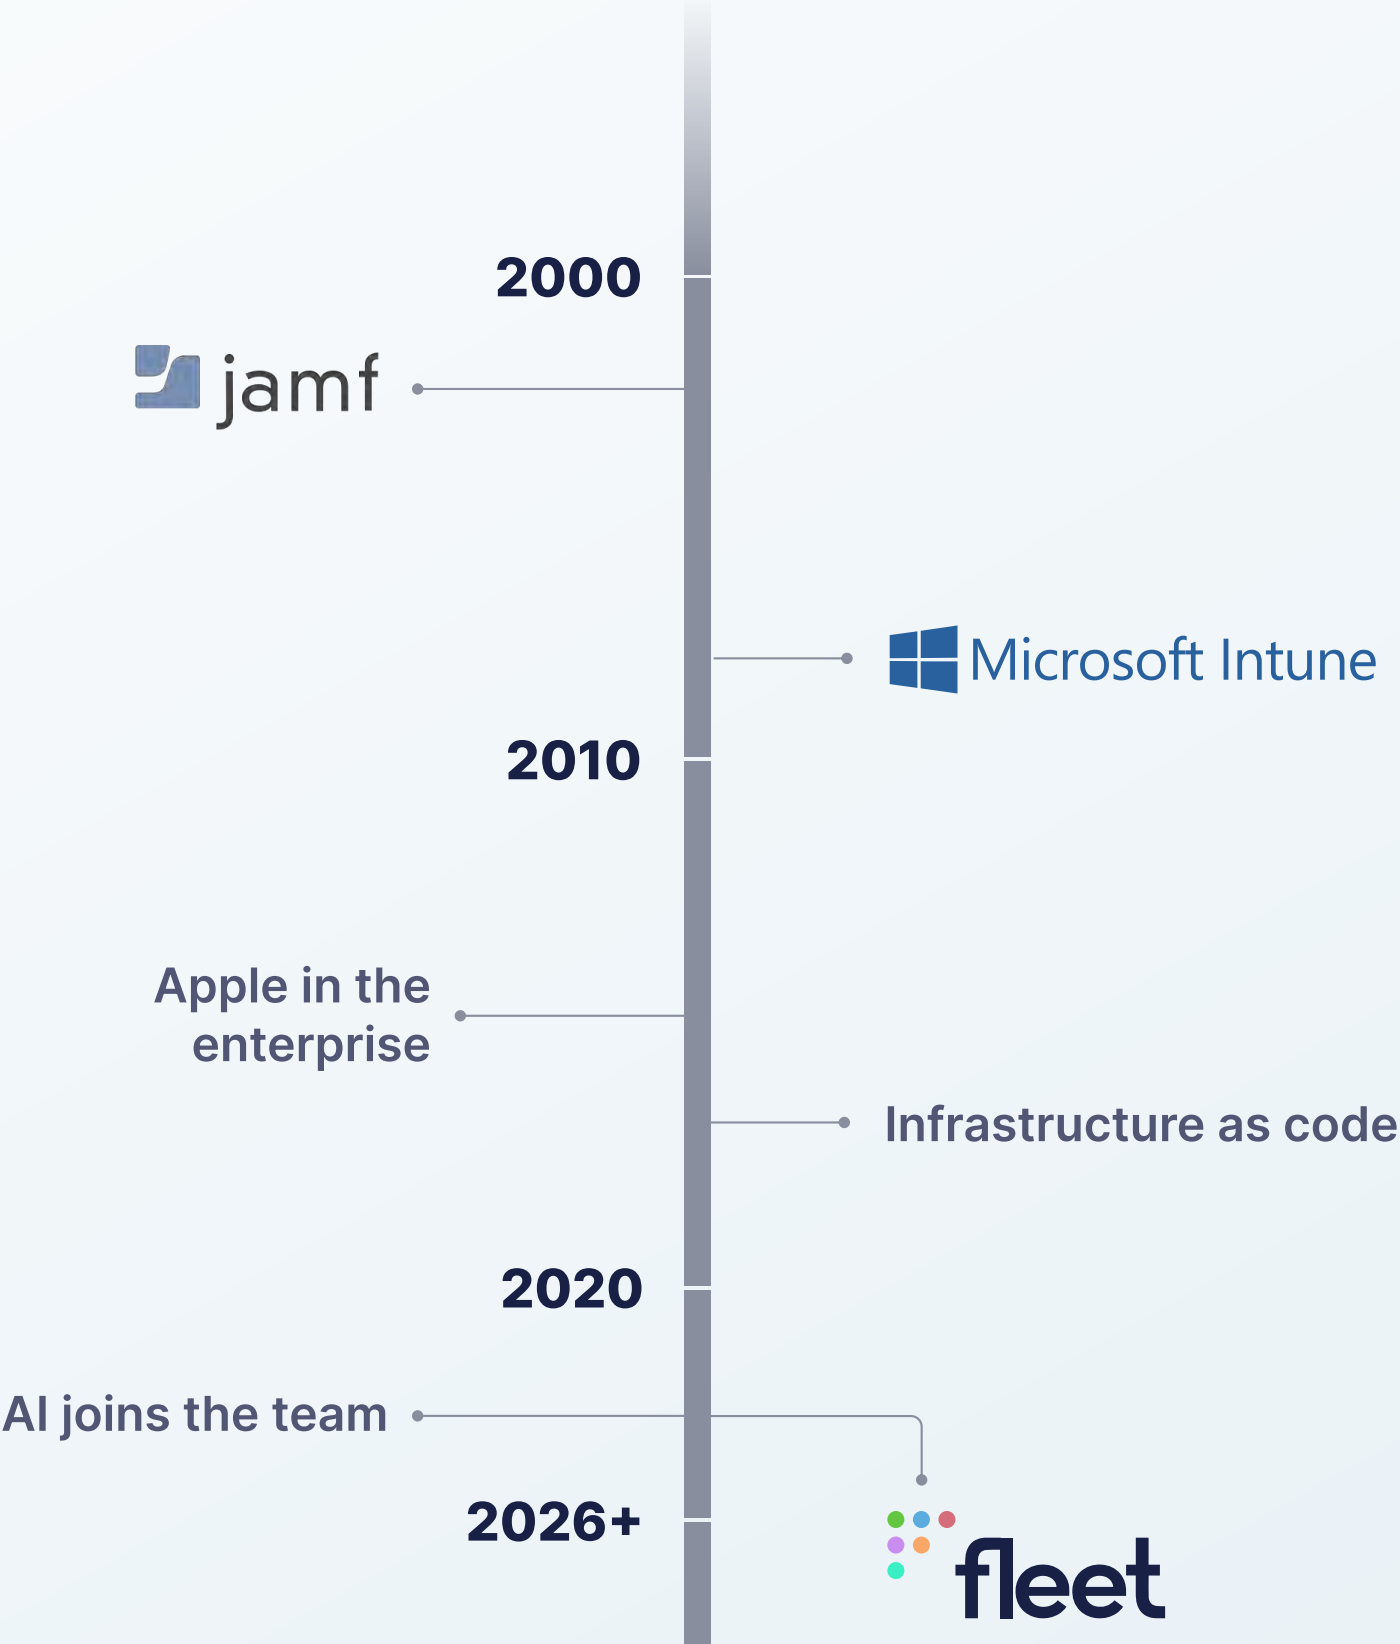

Open MDM, patching, and vulnerability management for every OS.

Post-demo summary prepared for:

The world has evolved rapidly

Traditional device management was built for computer labs in the early 2000s.

Save money and move faster

50% of Fleet customers already manage devices as code. It's what makes AI-assisted IT possible.

Work in the UI, automate with the API, or manage settings as code.

"The shift to GitOps has modernized our operations giving us the agility and change control we needed, giving leadership real-time confidence in device health and compliance."

Dan Jackson

Sr Manager Systems Engineering

Is it any good?

Teams like yours already use Fleet.

- **From 80% → less than 1%** onboarding errors at a leading GPU company, after switching to Fleet.
- **50%** less time on maintenance and 24% lower licensing costs at Foursquare.
- **10,000** devices migrated in 10 days, hundreds of thousands saved annually at Stripe.

Your path to Fleet

1

Proof of value

Shared Slack, dedicated support.

2

Contract signed

Procurement can take a few days to weeks depending on your process.

3

Migration

Phased rollout. As little as two weeks.
Stripe moved 10,000 devices in 10 days.

4

Live

Most teams report 114% ROI or higher by month 3.
